3-Month VDP & Bug Bounty Advanced Course

Vulnerability Disclosure Program | Advanced Bug Bounty Hunting | Ethical Hacking

Duration: 12 Weeks
Level: Advanced
Format: Theory + Hands-on Labs

TOTAL DURATION	TOTAL MODULES	LAB ENVIRONMENTS
12 Weeks | 3 Months	**12 Modules | 48 Topics**	**Local OVA & Wolf Hosting Labs**

CERTIFICATION	TARGET AUDIENCE
Cyber Wolf VDP & Bug Bounty Pro	**Security Researchers, Pentesters**

Lab Type Legend: OVA Lab – Downloadable Virtual Machine (Local) Wolf Lab – Cyber Wolf Hosted Online Lab OVA + Wolf – Both Available Theory – Lecture / No Lab

Month 1 — Web Security Foundations & Reconnaissance

Week 1 — Web Application Security Fundamentals

#	Topic	Description	Duration	Lab Type	Lab Name
1.1	Course Introduction & Setup	Course overview, VDP vs Bug Bounty fundamentals, setting up Kali Linux, Burp Suite, and lab environment.	2 hrs	OVA Lab	CW-Lab-01
1.2	HTTP/HTTPS Protocol Deep Dive	Understanding requests, responses, headers, cookies, sessions, REST APIs, HTTP methods (GET, POST, PUT, DELETE, PATCH).	3 hrs	OVA + Wolf	CW-Lab-02

#	Topic	Description	Duration	Lab Type	Lab Name
1.3	Burp Suite Mastery	Proxy setup, Repeater, Intruder, Scanner, Decoder, Sequencer, Extensions (Autorize, Logger++, Hackvertor).	4 hrs	Wolf Lab	CW-Lab-03
1.4	Browser DevTools for Security	Network tab, Storage inspector, JavaScript console, Source tab analysis for bug hunting.	2 hrs	Theory	—

Week 2 — Reconnaissance & Information Gathering

#	Topic	Description	Duration	Lab Type	Lab Name
2.1	Passive Reconnaissance	OSINT techniques, WHOIS, Google Dorks, Shodan, Censys, VirusTotal, Wayback Machine, Certificate Transparency.	3 hrs	OVA + Wolf	CW-Lab-04
2.2	Subdomain Enumeration	Subfinder, Amass, Assetfinder, DNSx, MassDNS, permutation tools, passive vs active enumeration strategies.	4 hrs	Wolf Lab	CW-Lab-05
2.3	Active Reconnaissance	Nmap scanning, port discovery, service enumeration, fingerprinting, WAF detection (wafw00f), tech detection (Wappalyzer, Whatweb).	4 hrs	OVA Lab	CW-Lab-06
2.4	Content Discovery & Fuzzing	Gobuster, ffuf, feroxbuster, directory/file brute-forcing, parameter discovery, custom wordlists (SecLists).	4 hrs	OVA + Wolf	CW-Lab-07

Week 3 — OWASP Top 10 (Part 1): Injection & Access Control

#	Topic	Description	Duration	Lab Type	Lab Name
3.1	SQL Injection Fundamentals	Error-based, Union-based, Blind Boolean, Time-based Blind SQLi. Manual exploitation and SQLMap automation.	5 hrs	OVA + Wolf	CW-Lab-08

#	Topic	Description	Duration	Lab Type	Lab Name
3.2	NoSQL Injection	MongoDB injection, operator injection ($gt, $ne, $where), authentication bypass, data exfiltration from NoSQL databases.	3 hrs	Wolf Lab	CW-Lab-09
3.3	Broken Access Control	IDOR (Insecure Direct Object References), horizontal & vertical privilege escalation, forced browsing, BOLA/BFLA for APIs.	4 hrs	OVA + Wolf	CW-Lab-10
3.4	Command Injection & RCE	OS command injection, blind command injection, RCE via various injection points, chaining vulnerabilities for maximum impact.	4 hrs	OVA Lab	CW-Lab-11

Week 4 — OWASP Top 10 (Part 2): XSS, CSRF & Misconfigurations

#	Topic	Description	Duration	Lab Type	Lab Name
4.1	Cross-Site Scripting (XSS)	Reflected, Stored, DOM-based XSS. Filter bypass techniques, polyglots, context-based payloads, cookie stealing, keylogging.	5 hrs	OVA + Wolf	CW-Lab-12
4.2	CSRF & Clickjacking	Cross-Site Request Forgery attacks, token bypass, SameSite cookie abuse, Clickjacking via iframes, X-Frame-Options bypass.	3 hrs	Wolf Lab	CW-Lab-13
4.3	Security Misconfigurations	Exposed admin panels, default credentials, verbose errors, directory listing, cloud storage misconfigurations (S3, GCS, Azure Blob).	4 hrs	OVA + Wolf	CW-Lab-14
4.4	Month 1 — Capture the Flag Challenge	Hands-on CTF challenge integrating all Month 1 topics. Students hunt for multiple vulnerabilities in a simulated real-world application.	4 hrs	OVA + Wolf	CW-CTF-M1

Month 2 — Advanced Exploitation & API Security

Week 5 — Advanced Web Vulnerabilities

#	Topic	Description	Duration	Lab Type	Lab Name
5.1	Server-Side Request Forgery (SSRF)	SSRF basics, blind SSRF, cloud metadata exploitation (AWS IMDSv1/v2, GCP, Azure), SSRF to RCE, DNS rebinding, filter bypass techniques.	5 hrs	OVA + Wolf	CW-Lab-15
5.2	XML External Entity (XXE)	Classic XXE, blind XXE, XXE via file uploads, SVG/DOCX injection, XXE to SSRF pivoting, OOB data exfiltration.	4 hrs	Wolf Lab	CW-Lab-16
5.3	File Upload Vulnerabilities	Unrestricted file upload, MIME type bypass, extension bypass, polyglot files, ImageMagick exploits, path traversal via upload.	4 hrs	OVA Lab	CW-Lab-17
5.4	Path Traversal & LFI/RFI	Directory traversal, Local/Remote File Inclusion, log poisoning, PHP wrappers, LFI to RCE chaining techniques.	4 hrs	OVA + Wolf	CW-Lab-18

Week 6 — Authentication & Session Management Attacks

#	Topic	Description	Duration	Lab Type	Lab Name
6.1	JWT Attacks	JWT structure, none algorithm attack, weak secret brute-force, algorithm confusion (RS256→HS256), kid injection, JWK injection, JWT cracking with hashcat.	5 hrs	OVA + Wolf	CW-Lab-19
6.2	OAuth 2.0 Vulnerabilities	OAuth flow analysis, open redirect abuse, state parameter bypass, CSRF in OAuth, token leakage, account takeover via OAuth misconfig.	5 hrs	Wolf Lab	CW-Lab-20

#	Topic	Description	Duration	Lab Type	Lab Name
6.3	Session Hijacking & Fixation	Session prediction, session fixation attacks, cookie theft via XSS, HttpOnly/Secure flags analysis, SameSite bypass.	3 hrs	OVA Lab	CW-Lab-21
6.4	Password Reset Flaws	Insecure reset token generation, host header injection in reset emails, token reuse, race conditions in reset flows, account takeover chains.	4 hrs	OVA + Wolf	CW-Lab-22

Week 7 — API Security Testing

#	Topic	Description	Duration	Lab Type	Lab Name
7.1	REST API Security	API enumeration, endpoint discovery, Postman/Insomnia usage, OWASP API Top 10, mass assignment, improper asset management.	5 hrs	Wolf Lab	CW-Lab-23
7.2	GraphQL Security Testing	GraphQL introspection, query depth attacks, batching attacks, IDOR in GraphQL, field suggestions abuse, authorization bypass.	4 hrs	OVA + Wolf	CW-Lab-24
7.3	BOLA & Broken Function Level Auth	Broken Object Level Authorization (BOLA/IDOR in APIs), function-level privilege escalation, mass assignment vulnerabilities in JSON APIs.	4 hrs	Wolf Lab	CW-Lab-25
7.4	Mobile API Interception	Android/iOS app traffic interception, SSL pinning bypass (Frida, objection), API key extraction from APK, Jadx usage.	4 hrs	OVA Lab	CW-Lab-26

Week 8 — Business Logic & Race Condition Attacks

#	Topic	Description	Duration	Lab Type	Lab Name
8.1	Business Logic Vulnerabilities	Price manipulation, quantity tampering, workflow bypass, coupon abuse, negative values, multi-step process exploitation.	5 hrs	Wolf Lab	CW-Lab-27
8.2	Race Conditions & TOCTOU	Time-of-check to time-of-use, concurrent request exploitation using Turbo Intruder, Burp Suite, race condition in payments/credits.	4 hrs	OVA + Wolf	CW-Lab-28
8.3	HTTP Request Smuggling	CL.TE and TE.CL smuggling, detecting via timing, exploiting to bypass security controls, cache poisoning via smuggling.	4 hrs	Wolf Lab	CW-Lab-29
8.4	Month 2 — CTF Challenge	Advanced CTF covering API security, JWT attacks, business logic, and SSRF. Simulate real-world private program scope.	4 hrs	OVA + Wolf	CW-CTF-M2

Month 3 — VDP Programs, Bug Bounty Mastery & Reporting

Week 9 — Advanced Exploitation Techniques

#	Topic	Description	Duration	Lab Type	Lab Name
9.1	Subdomain Takeover	Identifying dangling DNS records, takeover via GitHub Pages, Heroku, Shopify, S3 buckets, fingerprinting vulnerable services.	4 hrs	OVA + Wolf	CW-Lab-30
9.2	Cache Poisoning & Deception	Web cache poisoning via unkeyed headers, cache deception attacks, CDN exploitation, Vary header abuse.	4 hrs	Wolf Lab	CW-Lab-31
9.3	SSTI (Server-Side Template Injection)	Identifying template engines (Jinja2, Twig, FreeMarker), SSTI to RCE payloads, sandbox escapes, filter bypass techniques.	4 hrs	OVA Lab	CW-Lab-32

#	Topic	Description	Duration	Lab Type	Lab Name
9.4	CORS Misconfiguration	Origin reflection, null origin bypass, trust of subdomains, exploiting CORS for data exfiltration, CORS with credentials.	3 hrs	Wolf Lab	CW-Lab-33

Week 10 — Cloud Security & Infrastructure Bugs

#	Topic	Description	Duration	Lab Type	Lab Name
10.1	AWS Security Testing	IAM misconfigurations, S3 bucket enumeration, metadata service exploitation (IMDSv1), AWS CLI abuse, Lambda security testing.	5 hrs	Wolf Lab	CW-Lab-34
10.2	GCP & Azure Security	Google Cloud metadata exploitation, Azure SAS token abuse, GCS bucket misconfiguration, service account key exposure.	4 hrs	Wolf Lab	CW-Lab-35
10.3	Docker & Kubernetes Security	Container escape techniques, privileged container abuse, exposed Docker API, K8s RBAC misconfiguration, secrets in environment variables.	4 hrs	OVA Lab	CW-Lab-36
10.4	Exposed Services & Sensitive Data	Exposed .git directories, .env files, API keys in JS, GitHub dorking, hardcoded credentials, sensitive data in Wayback Machine.	3 hrs	OVA + Wolf	CW-Lab-37

Week 11 — VDP Programs & Bug Bounty Platforms

#	Topic	Description	Duration	Lab Type	Lab Name
11.1	Understanding VDP Programs	VDP vs Bug Bounty differences, responsible disclosure ethics, safe harbor clauses, CVE process, coordinated disclosure timelines.	3 hrs	Theory	—

#	Topic	Description	Duration	Lab Type	Lab Name
11.2	HackerOne & Bugcrowd Platforms	Platform navigation, selecting programs, reading scope carefully, program policies, triage process, reputation building, Hall of Fame.	3 hrs	Wolf Lab	CW-Lab-38
11.3	Intigriti, Synack & Private Programs	EU platform usage, invitation-only programs, managed platforms, getting into private programs, building reputation on public programs.	3 hrs	Theory	—
11.4	Bug Bounty Methodology & Automation	Building recon automation pipelines (Nuclei, httpx, gau, waybackurls), mass scanning responsibly, alerting systems, continuous monitoring.	5 hrs	OVA + Wolf	CW-Lab-39

Week 12 — Report Writing, Impact Analysis & Final Assessment

#	Topic	Description	Duration	Lab Type	Lab Name
12.1	Vulnerability Report Writing	Writing high-quality bug reports, CVSS scoring (v3.1), impact analysis, PoC (Proof of Concept) crafting, reproducible steps, screenshots & videos.	4 hrs	Theory	—
12.2	Chaining Vulnerabilities for High Impact	Combining low/medium bugs into critical chains: XSS + CSRF + IDOR, SSRF + CORS + auth bypass, escalating severity through chaining.	5 hrs	OVA + Wolf	CW-Lab-40
12.3	Legal & Ethical Boundaries	Staying within scope, legal protections for researchers, Computer Fraud and Abuse Act (CFAA), GDPR implications, handling sensitive data found.	2 hrs	Theory	—
12.4	Final Capstone CTF & Assessment	Full-scope simulated Bug Bounty program with 10+ hidden vulnerabilities. Report submission, triage simulation, and Cyber Wolf certification exam.	6 hrs	OVA + Wolf	CW-CTF-FINAL

Lab Environments

Available Lab Environments

Local OVA Labs (Downloadable)

- **Format:** .OVA Virtual Machine (VirtualBox / VMware)
- **OS:** Kali Linux Attacker VM + Vulnerable Target VMs
- **Offline Access:** Fully functional without internet
- **Included Apps:** DVWA, WebGoat, Juice Shop, VulnHub machines, custom Cyber Wolf targets
- **RAM Required:** Minimum 8 GB (16 GB recommended)
- **Storage:** ~15 GB per lab set
- **Distribution:** Downloadable via course portal
- **Support:** Setup guide + video walkthrough included

Wolf Hosting Labs (Cloud-Based)

- **Format:** Browser-accessible cloud lab environment
- **Access:** No installation required — runs in browser
- **Infrastructure:** Hosted on Cyber Wolf secure servers
- **Availability:** 24/7 access during course duration
- **Features:** Pre-configured attack + target environments
- **Tools Included:** Burp Suite, Nmap, ffuf, Nuclei, SQLMap, Metasploit
- **Reset Anytime:** One-click lab reset functionality
- **Support:** Live lab assistant + Discord community

Lab Summary by Module

Month	Week	Lab ID	Lab Name	Type	Vulnerability Focus
Month 1	Week 1	CW-Lab-01	Environment Setup Lab	OVA Lab	Kali Linux, Burp Suite, VM setup
Month 1	Week 1	CW-Lab-02	HTTP Protocol Lab	OVA + Wolf	HTTP methods, headers, cookies
Month 1	Week 1	CW-Lab-03	Burp Suite Mastery Lab	Wolf Lab	Proxy, Intruder, Repeater
Month 1	Week 2	CW-Lab-04	OSINT & Passive Recon Lab	OVA + Wolf	Google Dorks, Shodan, WHOIS
Month 1	Week 2	CW-Lab-05	Subdomain Enum Lab	Wolf Lab	Subfinder, Amass, DNSx

Month	Week	Lab ID	Lab Name	Type	Vulnerability Focus
Month 1	Week 2	CW-Lab-06	Active Recon Lab	OVA Lab	Nmap, Whatweb, wafw00f
Month 1	Week 2	CW-Lab-07	Content Discovery Lab	OVA + Wolf	ffuf, Gobuster, SecLists
Month 1	Week 3	CW-Lab-08	SQL Injection Lab	OVA + Wolf	Error, Union, Blind, Time-based SQLi
Month 1	Week 3	CW-Lab-09	NoSQL Injection Lab	Wolf Lab	MongoDB, operator injection
Month 1	Week 3	CW-Lab-10	IDOR & Access Control Lab	OVA + Wolf	Broken Access Control, IDOR
Month 1	Week 3	CW-Lab-11	Command Injection Lab	OVA Lab	OS Command Injection, RCE
Month 1	Week 4	CW-Lab-12	XSS Lab	OVA + Wolf	Reflected, Stored, DOM XSS
Month 1	Week 4	CW-Lab-13	CSRF & Clickjacking Lab	Wolf Lab	CSRF bypass, iframe attacks
Month 1	Week 4	CW-Lab-14	Misconfiguration Lab	OVA + Wolf	Admin panels, S3 buckets
Month 1	Week 4	CW-CTF-M1	Month 1 CTF Challenge	OVA + Wolf	All Month 1 Topics
Month 2	Week 5	CW-Lab-15	SSRF Lab	OVA + Wolf	SSRF, Cloud Metadata, Blind SSRF
Month 2	Week 5	CW-Lab-16	XXE Injection Lab	Wolf Lab	XXE, OOB, SVG injection
Month 2	Week 5	CW-Lab-17	File Upload Lab	OVA Lab	Unrestricted upload, polyglot
Month 2	Week 5	CW-Lab-18	LFI/RFI & Path Traversal Lab	OVA + Wolf	LFI to RCE, PHP wrappers
Month 2	Week 6	CW-Lab-19	JWT Attacks Lab	OVA + Wolf	None alg, alg confusion, weak secret

Month	Week	Lab ID	Lab Name	Type	Vulnerability Focus
Month 2	Week 6	CW-Lab-20	OAuth 2.0 Lab	Wolf Lab	OAuth misconfig, ATO
Month 2	Week 6	CW-Lab-21	Session Hijacking Lab	OVA Lab	Session fixation, cookie theft
Month 2	Week 6	CW-Lab-22	Password Reset Flaws Lab	OVA + Wolf	Host header injection, token reuse
Month 2	Week 7	CW-Lab-23	REST API Security Lab	Wolf Lab	OWASP API Top 10
Month 2	Week 7	CW-Lab-24	GraphQL Security Lab	OVA + Wolf	Introspection, query attacks
Month 2	Week 7	CW-Lab-25	BOLA & API Auth Lab	Wolf Lab	BOLA, function-level auth
Month 2	Week 7	CW-Lab-26	Mobile API Lab	OVA Lab	SSL pinning bypass, APK analysis
Month 2	Week 8	CW-Lab-27	Business Logic Lab	Wolf Lab	Price manipulation, workflow bypass
Month 2	Week 8	CW-Lab-28	Race Conditions Lab	OVA + Wolf	Turbo Intruder, TOCTOU
Month 2	Week 8	CW-Lab-29	HTTP Smuggling Lab	Wolf Lab	CL.TE, TE.CL smuggling
Month 2	Week 8	CW-CTF-M2	Month 2 CTF Challenge	OVA + Wolf	All Month 2 Topics
Month 3	Week 9	CW-Lab-30	Subdomain Takeover Lab	OVA + Wolf	DNS takeover, dangling records
Month 3	Week 9	CW-Lab-31	Cache Poisoning Lab	Wolf Lab	Unkeyed headers, CDN abuse
Month 3	Week 9	CW-Lab-32	SSTI Lab	OVA Lab	Jinja2, Twig SSTI to RCE
Month 3	Week 9	CW-Lab-33	CORS Lab	Wolf Lab	Origin reflection, null bypass

Month	Week	Lab ID	Lab Name	Type	Vulnerability Focus
Month 3	Week 10	CW-Lab-34	AWS Security Lab	Wolf Lab	IAM, S3, Lambda security
Month 3	Week 10	CW-Lab-35	GCP & Azure Lab	Wolf Lab	Cloud metadata, SAS token abuse
Month 3	Week 10	CW-Lab-36	Docker & K8s Lab	OVA Lab	Container escape, RBAC misconfig
Month 3	Week 10	CW-Lab-37	Sensitive Data Exposure Lab	OVA + Wolf	.git, .env, API keys, GitHub dorking
Month 3	Week 11	CW-Lab-38	Bug Bounty Platforms Lab	Wolf Lab	HackerOne, Bugcrowd navigation
Month 3	Week 11	CW-Lab-39	Automation Pipeline Lab	OVA + Wolf	Nuclei, httpx, gau, mass scanning
Month 3	Week 12	CW-Lab-40	Vuln Chaining Lab	OVA + Wolf	XSS + CSRF + IDOR chains
Month 3	Week 12	CW-CTF-FINAL	Final Capstone CTF	OVA + Wolf	All Topics — Certification Exam

Tools & Resources Covered

Burp Suite Pro	Nmap / Masscan	SQLMap
ffuf / Gobuster	Amass / Subfinder	Nuclei
httpx / dnsx	gau / Waybackurls	Metasploit
Frida / Objection	Jadx / APKTool	Shodan / Censys
Postman / Insomnia	Turbo Intruder	Hashcat / John
Nikto / WPScan	FFUF / Feroxbuster	SecLists (Wordlists)
Wappalyzer / Whatweb	Docker / VirtualBox	AWS CLI / GCloud CLI

Python (Custom Scripts) | **Bash Automation** | **OWASP ZAP**

Certification & Assessment

Assessment	Type	Weight	Description
Month 1 CTF	Practical	20%	Capture the Flag — Web security basics, OWASP Top 10 challenges
Month 2 CTF	Practical	25%	Advanced exploitation — API, JWT, business logic, smuggling
Bug Report Assignment	Written	20%	Write a professional vulnerability report with PoC for a given finding
Final Capstone CTF	Practical	25%	Full-scope simulated Bug Bounty program with 10+ hidden vulnerabilities
Theory Quiz	MCQ/Short Answer	10%	Online quiz covering VDP concepts, legal ethics, CVSS scoring, platform rules

Cyber Wolf Certification: Upon passing (70%+ score), students receive the **Cyber Wolf — Certified VDP & Bug Bounty Professional (CW-CVBBP)** digital certificate, verifiable on the Cyber Wolf portal at www.cyberwolf.pro.

CYBER WOLF
